--------------	-------------------------------------	------------------------------------------	-------------------------------------	------------------------------------------	--------------------------------	-----------------------------------	-------------------------	------------

- 1. Research and Adapt:** Find out why customers returning technology products at higher rate and if certain office supplies are worth selling.
- 2. Training:** Conduct mandatory training for key stakeholders on how to use the interactive filters to diagnose root causes.
- 3. Set a Target:** Establish **Return Rate** targets for the two high-risk categories (Technology and Office Supplies) and assign ownership for reducing those rates by a set percentage within the next quarter.
- 4. Cost Integration:** Future iteration of the dashboard must integrate the **Total Cost of Returns** metric (Monetary Value) to allow for financial prioritization alongside rate analysis.
